

**SPECIFICATION AMENDMENTS**

*Page 3, line 18 to page 4, line 2:*

In a preferred embodiment, the cover is dimensioned to receive the barrier post in slip-fit engagement and adapted to support an advertising display such as a message of stenciled letters, an electrical/electronic circuit comprising one or more lighting elements configured to display a message or image, one or more magnetically mounted objects of a ferro-magnetic material supported on metallic surface, ~~Velcro~~ Velcro® materials, peg boards, a chalkboard surface, or combinations thereof.

*Page 5, lines 11-18:*

Referring again to Figure 1, the barrier cover with advertising 10 is shown at a stage that precedes installation with a substantially semi-circular barrier post 24. To install, an installer would receive the barrier post 24 into the interior cavity 16 of the post cover 10 by slip fitting the post cover 10 onto the barrier post 24 as shown by the directional arrows 26. Referring to Figures 1 and 2, an advertising display 18 is shown disposed on a first elongated planar and semi-circular surface 12 but, alternatively (referring to Figure 3), it can either be disposed on a second elongated planar and semi-circular surface 14, on both surfaces, or on the entire cover. As best seen in Figure 3, surfaces 12 and 14 transition to side panel 40 having an outermost edge 42.
